

## THE SPECIAL CATS OF CATS ANGELS

Kermit the Frog sang that 'It's Not Easy Being Green' and for some of the Cats Angels kitties, it's not easy being Special Needs. Annabelle, PawPaw and Buddy are three of the sweetest cats you will ever meet -- all three have tested positive for Feline AIDS. They can live long and healthy lives and the only special treatment they need is regular vet checkups and safe indoor living. Stuart has a couple health issues. He was born without complete eye-lids. Dr. Jen Towles of Amelia Island Animal Hospital has been kind enough to help him with this. He also has a slight heart murmur that may need medication as he gets older, but other than that he is one cool cat. Zak Dinks is panther-like with his sleek black coat, but to us he's our resident pirate with one eye. All of the kitties at Cats Angels are special to us - these are just some that are extra special and looking for their forever homes.

Maybe you're looking for that extra special someone, too.

As a rescue group, Cats Angels makes every effort to see to the medical needs of all of the cats in our care. Some require specialized veterinary care. This year we have taken in cats and kittens with special eye issues and digestive problems. It is through your donations that these cats and kittens receive the best possible treatment. Can you help us again?

**Yes, I want to help!**

Please accept my donation in the amount of:
